

Journal of Risk and Insurance

2015 Editor Report

**Print version of the Report
Presented to the ARIA Board August 2015**

1. Submission and Publication Statistics.

The *Journal* continues to have a healthy flow of submissions, with 86 new submissions during the first six months of 2015, which compares favorably to the 177 new submissions received during the 2014 calendar year. In terms of backlog, the *Journal* currently has 69 articles that have been accepted for publication, but have not yet appeared in the print edition. After the nine articles already scheduled for the September issue are pulled from the queue, our backlog will be 60 papers, the same as in last August's report. The status of the accepted papers is described in the following table.

Posted on Early View	In Production	In Proofing	In Editorial Office	Total Accepted
51	3	10	5	69

As noted in previous reports, due to a server failure in August 2012 the manuscripts submitted prior to January 1, 2013 are handled as paper files with correspondence by email. The Assistant Editor, Lisa Ford, has completed an exhaustive examination of the archived emails to ascertain the disposition of all these legacy manuscripts, and the following table provides a description of their disposition to date.

Disposition of Manuscripts Submitted Prior to 2013

	Submissions	Accepted	Rejected	Under Review	Invited Resubmission	Withdrawn
2012	194	47	120	6	12	6
2011	150	33	106	0	8	3
2010	141	34	94	0	13	0
2009	141	49	84	0	7	1
2008	166	64	87	0	15	0

The Editorial office has handled 18 papers in this fashion so far this year, compared with 53 during 2014 and 164 during 2013. We are working our way through these legacy manuscripts, and we currently have only 8 in active status. The following table provides a breakdown of the disposition of the legacy manuscripts that have been handled by the Editorial Office during 2015.

Status of Manuscripts Submitted Prior to 2013

	Accepted	Rejected	Active	Withdrawn
2012	5	0	8	5
2011	0	0	0	
2010	0	0	0	
2009	0	0	0	

Submissions since January 1, 2013 are processed through the ScholarOne web portal, which has been highly customized to fit the *Journal's* needs and which has performed very well. Since its inception in January 2013, ScholarOne has processed 451 new submissions, the disposition of which is described in the following table.

Disposition of Original Submissions: January 1, 2013 - June 30, 2015

Minor Revision	Major Revision	Reject After Review	Desk Reject	Under Review	Total
9	122	190	82	48	451

Of the 403 original submissions for which an initial decision has been made, the time required to reach that decision is described in the next table.

Original Submissions: Time to First Decision

	Major Revision	Minor Revision	Reject After Review	Desk Reject	Total
Number	122	9	190	82	403
Percentage	30.3%	2.2%	47.1%	20.4%	100%
Average Days to Decision	117.70	112.11	102.72	38.3	N/A

The web portal has also been used to process revised manuscripts of papers submitted since 2013, some of which have been revised several times. The disposition of these revised manuscripts is described in the following table.

Disposition of Revised Manuscripts: January 1, 2013 - June 30, 2015¹

Accepted	Minor Revision	Major Revision	Reject	Under Review	Total
45	43	32	13	15	148

Of the 133 revised manuscripts received by the Editorial Office through ScholarOne for which a decision has been reached, the time required to reach that decision is contained in the following table.

Revised Manuscripts: Time to Decision

	Accept	Major Revision	Minor Revision	Reject	Total
Number	45	32	43	13	133
Percentage	33.8%	24.1%	32.3%	9.8%	100%
Average Days to Decision	28.89	86.50	64.37	86.54	N/A

Finally, the *Journal* has, since the beginning of 2013, received new submissions from corresponding authors in 45 countries. Submissions from the United States accounted for 30.6% of this number, followed by Taiwan (9.5%), Germany (9.3%) and Canada (6.4%). A complete listing is contained in Appendix A.

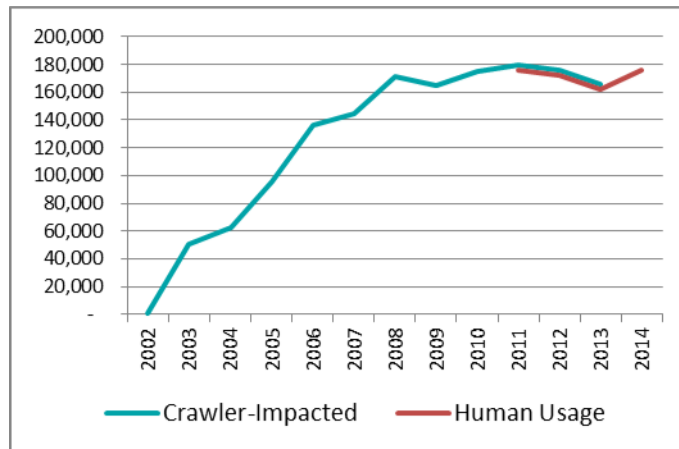

2. Impact Assessment

The impact factor, produced by the Journal Citation Reports of the Institute for Scientific Information, is the most frequently used measure of journal quality. The 2014 two-year impact factor is calculated by dividing the number of citations in 2014 of articles published in the *JRI* in 2012 and 2013 by the total number of articles published in 2012 and 2013. The 2014 impact factor was 1.075, up slightly from the corresponding 2013 impact factor of 1.000. The 2014 five-year impact factor was 1.385, a slight decrease from the corresponding 2013 five-year impact factor of 1.408.

In terms of citation rankings, the *Journal* was in 2014 ranked 39/88 amongst business and finance journals (as compared to 38/89 in 2013), and 130/333 in economics journals (where the 2013 ranking was 134/332).

¹ Note that some manuscripts appear in this table several times, for example as another major revision, a minor revision, and an ultimate acceptance or rejection.

According to the *Wiley-Blackwell Publisher's Report 2014*, the number of full text downloads for the *JRI* from the Wiley Online Library and 3rd parties during 2014 has increased, as the chart from the *Report* below indicates.²

The blue line shows “crawler-impacted” usage previously reported; the red line shows the “human usage” with all the detected crawler traffic eliminated following improvements to reporting. Totals include usage on Wiley Online Library, EBSCO and other third-party databases.

Currently, 1,241 individuals are registered to receive automatic content alerts, which is a 4.6% increase over 2013.

From July 1, 2014 to June 30, 2015, there were 3055 abstract views and 661 full paper downloads from the IDEAS (RePEc) web site, down from 3827 and 857, respectively, in the previous 12 months.

All articles published in the *Journal* are automatically uploaded to the IDEAS website (located at <http://ideas.repec.org/s/bla/jrinsu.html>) as well as the EconPapers website (located at <http://econpapers.repec.org/article/blajrinsu/>).

3. Editorial Board.

While all of the legacy manuscripts have been handled directly by the Editor, those submitted through ScholarOne are assigned either to the Editor, or to one of the six Co-Editors. Each of the Co-Editors has agreed to supervise 12-14 submissions per year, which for each paper entails the assignment of reviewers and the making of a recommendation to the Editor regarding disposition. The Co-Editors also manage any resubmissions of original manuscripts to which they were assigned. The six Co-

² In the past, the report provided numbers of downloads. This year, unfortunately, only the chart has been provided.

Editors are Richard Butler (Brigham Young University), Scott Harrington (University of Pennsylvania), Richard Phillips (Georgia State University), Harris Schlesinger (University of Alabama), Arthur Snow (University of Georgia) and Mary Weiss (Temple University). All of the Co-Editors have continued to be exemplary in the performance of their duties, which is greatly appreciated by the Editorial Office.

The distribution of assignments for manuscripts submitted through ScholarOne is presented in the following table.

Manuscripts by Editor: January 1, 2013 - June 30, 2015

Co-Editor	Number of Manuscripts	Percentage
Richard Butler	34	7.5%
Keith Crocker	226	50.1%
Scott Harrington	29	6.4%
Richard Phillips	28	6.2%
Harris Schlesinger	22	4.9%
Arthur Snow	28	6.2%
Mary Weiss	33	7.3%
Not Assigned to Editor ³	51	11.3%

David Cather remains the Book Review Editor. The current list of editors is contained in Appendix B.

4. Manuscript Referees.

The list of the 449 reviewers that have been used for the manuscripts handled by the Editorial Office since January 1, 2013 is contained in Appendix C. This list contains reviewers of both ScholarOne manuscripts and the legacy manuscripts handled by the Editorial Office.

5. Submission Development.

The *Symposium on Convergence, Interconnectedness and Crises: Insurance and Banking*, which was managed by David Cummins (Temple University), Georges Dionne (University of Montreal), and Elyas Elyasiani (Temple University) as guest editors, appeared in September 2014.

³ These are either on administrative hold in the Editorial Office awaiting additional information from the authors, or were desk rejected by the Editor-in-Chief without a co-editor assignment.

There are three other special issues scheduled. The first is *Behavioral Insurance and Behavioral Risk Management*, which is being managed by guest editors Andreas Richter (Ludwig-Maximilians-Universität Munich) and Glenn Harrison (Georgia State University), and is scheduled to appear as the December 2015 issue.

The second special issue will feature papers drawn from the *Tenth International Longevity Risk and Capital Markets Solutions Conference* that was held in Santiago, Chile during September of 2014. The guest editor of this special issue will be David Blake and the issue will appear as extra (fifth) issue during 2016. As noted in a previous report, the estimate from Wiley-Blackwell regarding the cost of a one-time fifth issue was approximately \$8182, and the guest editor has committed to cover \$5000 of this amount. Last year the Board agreed to cover the balance.

The third special issue will be entitled *Risk in Emerging Markets* and will feature papers drawn from the *Insurance Risk and Finance Research Conference* held at the Nanyang Technical University on June 25-26, 2015. The guest editors will be David Cummins (Temple University) and Michael Powers (Tsinghua University), and this special issue is expected to appear in 2017.

6. Mehr Award.

The Editorial Board is responsible for the selection of the Mehr Award recipient. Each year ARIA presents the Robert I. Mehr Award to the author(s) of the *JRI* article that has “best stood the test of time”. Since the articles must be at least ten years old, those papers appearing in 2005 were considered.

All of the Co-editors and the Associate Editors that do not have an article in the volume under consideration are eligible to vote. On March 20, 2015 the Assistant Editor sent to all members of the selection committee a list of articles to be considered from volume 72 of the *Journal*, including the abstract and a web link to the article in JSTOR. Each member of the selection committee was instructed to rank their top three choices. When the rankings were received in the Editorial Office, the Assistant Editor assigned each first choice 3 points, the second choices 2 points, and the third choices were given 1 point. A score was calculated for each candidate article. If there were to be no clear majority on the first ballot, a second ballot would be held.

This year there was a clear majority on the first ballot. The selection committee recommends that the 2015 Robert I. Mehr Award be given to Yijia Lin and Samuel H. Cox for their article entitled “Securitization of Mortality Risks in Life Annuities” (Volume 72, Number 2, June 2005).

7. ScholarOne, Wiley-Blackwell, and ARIA Administrative Staff.

The main contact with the publisher Wiley-Blackwell for matters involving the management of the *Journal* is now Matthew Cooper (mcooper@wiley.com), who has

recently replaced Brian Giblin. I worked closely with him last Fall to resolve the copyright line issue and he is accessible and responsive. Our Production Editor is Lou Philippe P. Manila (lpmanila@wiley.com), who has been both efficient and easy to deal with. Our original contact for ScholarOne issues was Sonia Wilson (swilson@wiley.com), who was instrumental in setting up the website and training the Editorial Office on its use. The ScholarOne web site has worked flawlessly, and our (mostly minor) questions are now directed to their help desk, which has been very effective.

The final manuscripts for accepted legacy submissions are sent by the Assistant Editor directly to Lou Manila at Wiley-Blackwell for processing. For those submissions processed through ScholarOne, the process is automatic after the acceptance decision.

From that point forward, the process of contacting the authors for proofreading and the preparation of the manuscript for publication is handled entirely by Wiley-Blackwell. Once a manuscript is ready to be displayed on Early View, the Editor is contacted to examine the last draft. After editorial approval, the manuscript is posted on-line in publication format and may be viewed through Early View at [http://onlinelibrary.wiley.com/journal/10.1111/\(ISSN\)1539-6975/earlyview](http://onlinelibrary.wiley.com/journal/10.1111/(ISSN)1539-6975/earlyview).

Articles formally scheduled to appear in a print issue are also displayed in the Wiley Online Library prior to the print issue publication.

The primary contacts with ARIA are Tony Biacchi and Jennifer Long. We have an excellent relationship with both.

Keith J. Crocker, Editor
Journal of Risk and Insurance
